

The next Yeovil College open event will be on Monday 16 January between 5 – 7.30pm.

Visitors can find out about everything on offer at the college from A Levels to Apprenticeships, university level options to vocational programmes, including the fantastic progression opportunities and support offered at the College.

Visitors will be able to find out more about a variety of Night School short courses, from hands on qualifications such as Basic Do It Yourself and Prepare your car for the MOT to digital, Introduction to Adobe Graphic Design Skills.

Ariel Motors will be attending with a variety of vehicles.

Jonathan Andrews, Study Programme Manager at Yeovil College, said, “Ariel is the perfect example of engineering and motor vehicle excellence, with a constant drive to improve and create new concepts. They recruit locally and only take on full time fully qualified technicians. It’s therefore a great case study for our learners to see where their qualifications could take them.”

Current Performing Arts learners will also be performing various live performances on the campus.

Principal John Evans will provide a talk about ongoing developments at the College.

Yeovil College is proud to offer qualifications from entry level training right up to Master’s degrees, meaning that local people can realise their potential without having to leave the area.
